To Whom It May Concern,

Following https://github.com/opensearch-project/.github/blob/main/RESPONSIBILITIES.md#becoming-a-maintainer, I nominate the following people from Improving to be added as maintainers to OpenSearch ODBC driver and OpenSearch JDBC driver repositories:

- Andrew Carbonetto (https://github.com/acarbonetto)
- Forest Vey (https://github.com/forestmvey)
- Guian Gumpac (https://github.com/GumpacG)

I vote to support them to become maintainers. Please vote by replying to this email. When there are "three positive (+1) maintainer votes, and no vetoes (-1)", I'll update MAINTAINERS.md and ask admin to adjust permissions.

Thanks,

Yury Fridlyand | Software Developer
