Changes for this release

Description of change	Images	Styles	Scripts	Includes	Template
Implement franchise specific API keys for GCP places and maps API requests	-	-	Yes	-	-
Data not found is displayed - Housing	-	-	Yes	-	-
Mini Maps component	-	-	Yes	-	-
Butterfly error displayed when clicked on search the first time	-	-	Yes	-	-

Implement franchise specific API keys for GCP places and maps API requests

GCP API keys have been generated for each franchise for maps and places api usage. The referral restrictions are at the franchise level. They now need to be implemented into the webpage's API requests.

Production Issue :Data not found is displayed - Housing

Fixed the issue of 'Data not found' on clicking map markers

Mini Maps component

Changed the implementation of mini maps component to use a function in SWE3 to implement Franchise specific keys correctly.

Butterfly error displayed when clicked on search the first time

Fixed the issue of map Butterfly initialisation function
